Economic Activity

The deterioration in Brazil's economic environment, which resulted in a decline in gross domestic product, has directly impacted the volume of tolled vehicles, which decreased by 1.4% in the last quarter but was partially offset by the fact that 1Q16 has one day more than 1Q15, which represents approximately 1.1% of additional traffic. It is worth highlighting the **1.1% growth of light vehicles in 1Q16**, which helped to offset the decline in heavy vehicles in the quarter.

ADT Traffic

Below is the traffic evolution of the Company's concessionaires measured by the Average Daily Traffic (ADT), a concept regularly used by **Abertis** to measure traffic performance.
